

STEWART NGOZO

SOFTWARE ENGINEER

PROFILE

Well versed in web development projects, from designing the front-end user interface, to implementing the backend logic, and integrating with databases. I'm capable of developing web systems using React.js, PHP/Laravel or Python web frameworks, as well as fundamental mobile development with Flutter. I'm also knowledgeable of standard industry technologies and am capable of providing entry-level IT support services for company hardware and software systems. I aspire to continue growing my skills and become a versatile software engineer, capable of delivering high-quality, scalable, and innovative solutions that meet modern demands.

PORTFOLIO PROJECTS

You can View my Portfolio Website at gsoveren.github.io

I've worked of projects such as the following:

- **Websites:** Landing pages, marketing pages, Blog sites, Enquiry forms and User Authentication forms.
- **Self-Service Web portals:** For Insurance companies and banking systems. Including Admin dashboard design and development.
- **User Interface Design & Prototyping:** Creating Interactive Prototypes with Adobe XD and Figma.
- **CRUD Application systems:** Full stack web projects with CRUD functionality (Create, Read, Update, and Delete). Using PHP/Laravel, Python/Flask.
